

FLEXBAR

PROFESSIONAL
MOBILE BARS

FLEXBAR.SE

Made in Sweden

Flexbar manufactures mobile bars and service desks in Gothenburg, Sweden. Our focus is on quality, flexibility and design. We work hard to constant develop our products and always be one step ahead.

We offer flexible quality products that last and help you create a flexible and more efficient work environment.

Flexibility

It takes only 30 seconds to assemble the bar. No tools, no loose items, and it folds to a fraction of its size for easy storage. Flexbar mobile bar is developed to be used for many different tasks. Everything from wine bar to check-in of conference guests, indoor and outdoor. With smart solutions the bar can be adapted to cover many needs. Magnetic fronts can easily be branded, and holes for ice buckets can be opened and closed. With minimalist Scandinavian design, our products can fit into most environments.

Sustainability

We love the beautiful west coast of Sweden where we have our manufacturing. And we want future generations to be able to enjoy the clean water and green forests. We therefore make sustainability a top priority. Our products can be dismantled and recycled. We are proud to use recycled aluminium from Hydro in our products.

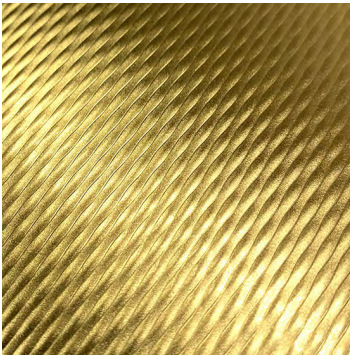

Hydro Circal is being extruded in the forests of Småland, Sweden. In our manufacturing we strive to use only local producers.

Your choice of material

Our bar can be customized with different choices of materials. We look forward to adapting our products to fit your design.

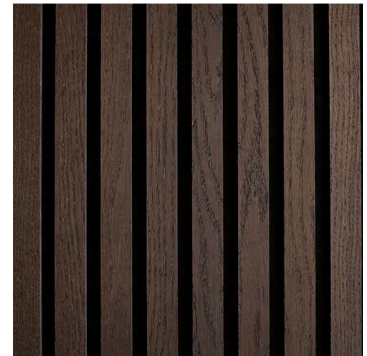

Design stainless steel plates

Magnetic foil on galvanized steel

Ribbon-wood
Sound absorbing

Easy branding

Magnetic foil is ideal for changing and can be printed individually according to your ideas. With a range of different foils, you can change the look of the bar from a coffee bar in the morning to a check-in desk in the afternoon. In the evening you can brand it for aperitif and roll it out on the terrace.

Accessories

We manufacture accessories that fit our products. Protective cover is always included. Speed rack, ice bins and wireless ledlighting are examples of accessories you can add on. We are constantly working on developing new accessories for our bars and service counters.
