

## LINK chair → Luca Fornasarig

---

The graceful curved back and clean profile are the ultimate synthesis of the Link chair. Drawing inspiration from both technological precision and architectural rationality, the Link chair is engineered to meet the demands of the contemporary dynamic workplace as well as those of conference halls, auditoriums, training centres and home offices. With a winning combination of high seating comfort and discreet elegance Link chair is easy to stack and move.

---

### Product Description

---

**Design** Thanks to the floating and nearly seamless connection from shell to frame defines a whole new integration, making the boundary between the frame and the seat hard to discern. Registered design.

---

**Frame** Stable full- high resistance steel sled-base diameter 11mm. The front bent traverse provide reinforcement to the design and is welded beneath the knee roll, thus retaining leg freedom. The seat and back are inset into the frame to optimise stackability while the underseat, integrated in the frame, protect the seat when the chair is stacked. Minimal stacking height ensures compact storage. This means reduced storage space requirements. LINK is lightweight, stable and with materials reduced to the max.

---

**Frame surface finish** **Eco-Chrome:** Extra-strength bright chrome plating, approximately 20 - 25 µm.  
**Powder coating:** Highly scratch-resistant thermoset powder coating, approximately 80 – 100 µm coating thickness. Our powder coating finish has no solvents and release no amount of Volatile Organic Compounds (VOC) into the atmosphere.

---

**Seat and Back** 3-dimensionally shaped ergonomic seat and back, make sitting on the chair both relaxing and very comfortable. The foams applied evenly on the seat are always fire retardant and they fulfil the English fire norm BS 5852 Schedule 1 Part I, the French M4, the California Bulletin and the Italian M1, which examines the cf. classification of the whole unit (foam + material).  
The seat is invisibly 8-times screwed to the frame and can therefore be easily removed. Should any damage occur after a long service life, the shell can be exchanged. What's more they're simple to replace should the necessity arise after years of use.

---

**Gliders** **Anti-rotating plastic glides** made from impact-resistant plastic for universal use.

---

**Linking** Easy to align in rows with the linking device available on request.

---

### Stackability

Up to 35 chairs on trolley  
Number of chairs per stack

15pcs on floor

---

### Safety and stress testing

Safety testing in accordance with standard **EN 1728** and **ANSI-BIFMA X5.1-2011**

- Leg strength test- Side application ANSI-BIFMA X5.1-2011/18

- Seat and back static load test EN 1728:2012+AC:2013

- Seat and back fatigue test EN 1728:2012+AC:2013

- Leg sideways static load test EN 1728:2012+AC:2013

---

### Environmental responsibility

**LINK X60 is up to 100% recyclable.** Components can be easily disassembled and recycled separately.

LINK Chair sets standards for product design that is "sustainable" in the most optimal way. The durability of the high-quality materials used, the innovative sitting concept and the classic design guarantee usability for many years

---

### Material content

**Total Weight** : 5,9 kg.

**Weight %** : Frame metal 59% - Seat and back 41% - Foam and fabric

---

### Warranty

The LINK X60 chair comes with a **10-year warranty**. The warranty covers breakage of frames and damage occurred because of deficient craftsmanship performance under normal use. The warranty shall lapse if the product shows signs of mishandling abuse or other physical damage. The warranty does not cover those parts of the product which are exposed to abrasion during use. For warranty terms and conditions refer to the catalogue and price list.

---

### Options and accessories

#### Linking device

Linking device removable, easy to remove plastic linking device

Metal floor linking system for intensive use

#### Options writing tablet

**Writing tablet** foldable, pivoted and removable

#### Options transport/storage trolley

**Heavy duty trolley** loading capacity: up to 400kg

---

### Technical drawings - All dimensions in cm. and inches
