WINX Chair

Modern, fully-upholstered chair of rounded shape designed for hotels, cafes and restaurants.

Design	Shell consists of two parts: <ul style="list-style-type: none">• The seat is a 13-layer beech moulding of 14 mm in thickness, veneer is 1,1 mm thick. It is upholstered with PUR foam thickness of 50 mm and bulk weight 70 kg/m³.• The backrest is an individual part firmly attached to the seat, comprised of wire frame with polyurethane filling. The hardness of polyurethane foam (filling) is about 70 kg/m³.
Base	Four-legged base consists of round legs made of natural oak solid wood, painted with polyurethane lacquer. Rounded legs are firmly attached to metal plate from the bottom of seat. The ends of legs are equipped with plastic sleeve for a plastic or felt glides. Plastic glide is used for hard floors (concrete, floor tiling), felt glide is used for soft floor surface (linoleum, PVC, wood). Glides are easily replaceable.
Upholstery	To be selected from fabric collection.
Warranty	5 years (see Business conditions)
